

# STREAMGRAM

## Workshop Notice!

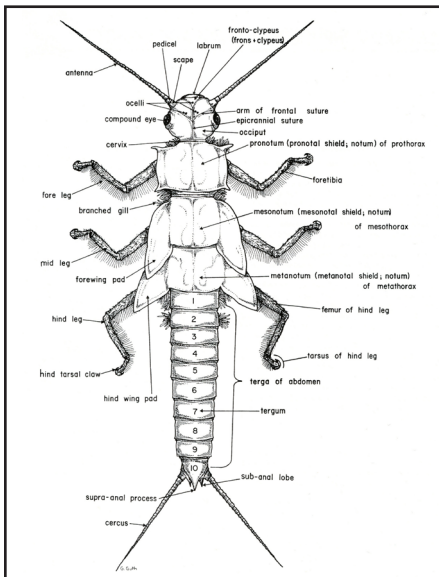

The Stream Team Academy is proud to announce:

# EPT Workshop

**Ephemeroptera • Plecoptera • Trichoptera**  
**Mayflies • Stoneflies • Caddisflies**

**Saturday, December 8, 2012**  
**Runge Nature Center, Jefferson City, MO**  
**9:00 a.m. – 5:00 p.m.**

**Registration  
deadline is  
November 21**

We will take a more in-depth look at common mayflies, stoneflies, and caddisflies in Missouri by exploring the morphological characteristics and ecology of these sensitive stream macroinvertebrates. Workshop attendees will use a dissecting microscope and dichotomous keys to identify insects to Family level. Please feel free to bring specimens that you have collected from your water quality monitoring trips to identify in the classroom.

**In order to be eligible to attend, you need to have completed a Level 1 Volunteer Water Quality Monitoring workshop and have a desire to learn more about stream macroinvertebrate morphology.**

This workshop will be held entirely indoors and lunch will be provided. Maximum class size is 15 students due to limited classroom space and availability of dissecting scopes. Class seats will be filled on a first-come-first-served basis and a letter of confirmation with more detailed information will be provided after you register.

To register, please contact Amy Meier at [Amy.Meier@mdc.mo.gov](mailto:Amy.Meier@mdc.mo.gov), or by calling (573) 522-4115 x 3166 for more information.

**Registration Deadline is Wednesday, November 21<sup>st</sup>, 2012.**
