

Candidate Streams for Volunteer Monitoring Projects

The following streams are higher priority for the Departments of Conservation and Natural Resources and provide potential monitoring locations for individuals wanting some help in finding a location to monitor. Additionally, they may also provide more interesting “special” monitoring projects for volunteers that have successfully completed the ST Level 2 VWQM Workshop.

For each “special project” there should be a rather formal monitoring plan agreed upon by the volunteers and the ST VWQM Program that identifies sites to be monitoring, parameters to be measured, as well as frequency and any other timing issues related to sample collection for a minimum of 36 months.

If you are interested in adopting one of these locations, or are interested in learning more about the Level 2 Special Projects, please contact Program Staff at: Streamteam@mdc.mo.gov

Locations highlighted in yellow indicate they are of importance to both of the sponsoring agencies.

Locations highlighted in green indicate there is an existing volunteer sampling plan in place

County	Stream Name	Monitoring Questions	Interested Agency
Adair Co.	Bear Cr.	a) are numeric criteria for bacteria, chloride, dissolved oxygen, pH exceeded? b) aquatic macroinvertebrate fauna impaired? c) Is there other evidence of impairment? d) are numeric criteria for ammonia being met?	DNR MDC
Andrew Co.	Dillon Cr.	(a) are numeric criteria for bacteria, chloride, dissolved oxygen, pH exceeded? (b) aquatic macroinvertebrate fauna impaired? (c) Is there other evidence of impairment? (d) are numeric criteria for ammonia being met? (e) are general criteria for objectionable bottom deposits and suspended material being met?	DNR MDC
Andrew Co.	Mace Cr.	(a) are general criteria for objectionable bottom deposits and suspended material being met?	DNR MDC
Atchison Co.	Rock Cr.	(a) are numeric criteria for bacteria, chloride, dissolved oxygen, pH exceeded? (b) aquatic macroinvertebrate fauna impaired? (c) Is there other evidence of impairment? (d) are numeric criteria for ammonia being met?	DNR MDC
Atchison Co.	Tarkio R.	(a) are numeric criteria for bacteria, chloride, dissolved oxygen, pH exceeded? (b) aquatic macroinvertebrate fauna impaired? (c) Is there other evidence of impairment? (d) are numeric criteria for ammonia being met?	DNR
Audrain Co.	S. Fk. Salt R.	(a) are numeric criteria for bacteria, chloride, dissolved oxygen, pH exceeded? (b) aquatic macroinvertebrate fauna impaired? (c) Is there other evidence of impairment? (d) are numeric criteria for ammonia being met?	DNR
