

VOLUNTEER WATER QUALITY MONITORING TRAINING

Join a network of thousands of citizen scientists collecting biological, chemical, and physical assessment data on Missouri's wadable streams. Training is free and certified monitors will receive equipment to measure biological and chemical data and stream flow.

LEVEL 1* TRAINING OPPORTUNITIES

Fall 2023

Certification requires completion of virtual training and a stream-side field training. There are no pre-requisites or costs to attend the Level 1 training.

Step 1. Virtual training

Complete all Level 1 training videos to be eligible to attend the stream-side field certification. These are self-paced and can be watched anytime.

Step 2. Stream-side field certification

During the field certification, you will practice monitoring methods at a stream site under the direction of Stream Team staff. Locations of these trainings include Kansas City, Saint Louis, Columbia, Neosho, Saint Joseph, and Springfield. Registration closes one week prior to the training.
